

TAKSHILA SCHOOL, SANGLI

South of Shree Datta Sai Mandir
100 Ft Road Sangli 416416

“Education is all about drawing out what is within and excelling in it!”

As is common with all new endeavors, the beginning of Takshila School, Sangli too was quite humble. In 2010, the school got registered under Moraya Education Trust with merely hundred students. The set up was simple, but aspirations were quite high!

It's no wonder then that now; 'Takshila' is a big name in and around Sangli. Today, it has the best infrastructure spread over five acres that a child-centric education process needs. The foundation for a progressive future of the students is now strongly laid. Takshila is the School which not only gives the best education but also a better family-like experience to all its members.

Takshila Schools is affiliated with CBSE and has classes till XII. (Affiliation Number -1130431) The School feels proud to declare that it has achieved 100 % RESULT every year!!

The Vision and Mission of Takshila is not only impressive but immaculately expressive of what Takshila Sangli aspires to achieve.

VISION STATEMENT

“The Takshila Schools aspire to provide education that will build capacity in our students to take the challenges of living and excelling in the global world, emerge as leaders of tomorrow, retain their Indian sensibilities which will enable them to respect elders, care for the fragile ecosystem and nurture the rich heritage of music, art and culture.”

MISSION STATEMENT

“We, at Takshila, make learning a pleasurable experience by imparting knowledge through our unique methodology which encourages creativity, sensitivity, and values with the best use of technology creating space for each and everyone associated with us.”

E-DAC Methodology

Well, the guiding rule for Takshila has been 'Excellence in Education for Excellence in Life'. Thus, E-DAC approach was selected to achieve the Vision and Mission of the school. The 'E-DAC' approach to learning is an innovative yet scientifically designed methodology which is based on the fact that gaining knowledge is an on-going process, a joyous journey, and a positive outcome!

Here's the pledge by the teachers which speaks volumes about being a Takshilite and about the E-DAC methodology:

I pledge

**As excited learners throng these grounds
And their exuberance endlessly abounds
As they grow quick in body and mind
As their vibrant wings spread around**

**I shall endeavor...
To encourage, excite and energize them
To engage with and explore their world**

**I shall endeavor ...
To give them the chance
To discover themselves and do their best**

**I shall endeavor ...
To assist their efforts
To assimilate, analyze and apply their minds**

**I shall endeavor ...
To create an environment
To consolidate, critically approach and create**

**For it's my duty and their right
To create a world that belongs to them
A world of opportunities, freedom and trust
Of joy and hope and responsibilities too
A world they own and not one that is thrust!**

Takshila, thus, has always followed the 'Constructivism' in education towards which the entire State and Nation seems marching these days. 'Constructive Activity based learning' is the buzz word these days in Education far and wide and we are definitely not behind!

Sport Achievement

Takshila School Sangli believes in 3H concept which talks about development of 3Hs- Head, Heart and Hand. Latter H deals with physical condition of students and as integral part of our education system sports and physical activities mean a lot. Our school has always kept an objective of enrichment of the school experiences of students within the context of the educational mission of schools. As such, school sports should be educational and contribute to the overall education of all students, not athletes only. Other objectives of school sports logically follow from the educational mission: citizenship, sportsmanship, fair play, teamwork, respect, and health and welfare of all students not only during the school years but continuing into adulthood.

Students naturally remain very much excited for their sports activities but Covid-19 pandemic has made all to live narrowed and restricted life. Eventually, students could not perform any activity or game due to this global bio-trouble. When lockdown had given relaxation to students to come back to school, their joy did not know any bounds. Normal sports activities were yet to be permitted. Students were taking all safety measures, were going on ground for preparations of their skills and techniques.

Takshila School's sports history is treasure for its name and fame in town. Students participate in wide range of sports activities and win. Be it individual games like skipping, wrestling, karate, boxing, kick-boxing, lawn-tennis, badminton, archery, athletics, etc. or be it team-games like cricket, kho-kho, net-ball, football, relay, etc. Students show boundless enthusiasm towards all these events. Some have outshone with their unusual and extra-ordinary performances and won medals and trophies.

Following is the detailed record of all the winners in different games:

Montex Ball Cricket Tournaments: Teams under 14 and under 17 were winners at district level (Miraj) and fought so well at state level championship (Yavatmal) and secured third place.

In an attempt to promote fitness among school children, the central board of secondary education observes fitness week as a part of FIT INDIA MOVEMENT. The prime objective of the initiative is to bring about a behavioural change in the school children and teacher in pandemic.

Efforts made in the Field of Environment Education

Contribution towards Environment Protection

"The environment is where we all meet where we all have a mutual interest; it is the one thing all of us share". The beauty of the nature has been a source of inspiration and delight to mankind. It is an endless source of joy.

The remarkable steps were taken by our school students from preprimary to secondary and all our teachers in bringing the campus; under the slogan "Live life cleaner by making our campus greener".

Since the 1970 student and all teachers have been participating in various amounts, in green campus process in the world. Primary focus is on recycling, waste production and management and water conservation.

In Takshila School Sangli under the grading campus various activities were conducted.

- On the World Environment Day (5th June) tree plantation was done in which various useful saplings were planted in the school campus with the Oath of every day care and students also made bird feeders.
- To make birthday more memorable precious and to get the happiness of 'joy of giving' students from all sections used to donate a sapling to school which made School campus green and beautiful? Donated saplings are taken care by School Gardner and that particular child.
- After the school dispersal students use to pour left/remaining water from their bottle to trees and plants.
- Teaching and non-teaching staff donated saplings on their birthdays or any special day.
- On the world Conservation Day, chart making activity was conducted to create the awareness regarding the sustainable development of environment.
- On the animal Welfare Day students have given the food to Street animals.

Parent Teacher Association Activities

Another important feature of Takshila is - it respects the parents who are an equally important factor for a child to experience a successful and smooth learning process. The school encourages 'Parent-Feedback' and the PTA (Parent – Teacher Association) which is formed every year ensures the same. Interested members are asked to join the PTA committee and matters are discussed and sorted out. Almost all PTM (Parent- Teacher Meetings) have been successful and the support of the PTA members has truly been helpful throughout the tenure.

Important PTA Decisions:

- Reopening school with Online Platform
- Yearly Fees of AY 21-22
- Reopening of the Offline School
- Full time School for Class Pre-primary to X
- Discount on Fees as per Govt. Norms.

Importance School Management Committee Decisions

The SMC plays a pivotal role in school governance to enhance the quality of education offered and works towards enhancing parents community participation in the school functioning and provide mechanisms for more effective management at school level. It also provides a platform where community and school pool resources for better management of the school.

Important SMC Decisions:

- Reopening school with Online Platform
- E-mentorship program.
- Reopening of the Offline School
- Full time School for Class Pre-primary to X
- Celebrations of Festivals and International Days
- Greening of the Campus

Innovation programme

Innovation programme provides a unique learning opportunity for students to develop their problem solving, thinking skills, equitable learning and to enhance their knowledge. Keeping this view ahead and for betterment of students Takshila School Sangli had arranged many innovative programs for students like:

- Open Art Classes in campus
- Create Own Brighter Future wall
- Self-Care Wheel
- Writing and Posting a Letter using post Card
- Chart Making: Balance Diet and etc.

Due to these activities under the innovation programme students came up with flying colors with their own new ideas and they proved that Innovation is the key to everything the future can be.

With more than 40 salient features to be proud of, Takshila wishes to leave its distinguished mark on the educational map of Southern Maharashtra. However, we strongly believe that all these activities, facilities, and the infrastructure is for the betterment of the students. The all-round development of the child into a capable and caring citizen is at the heart of everything that we say and do. The intention is to impart the up-to-date educational experiences and opportunities to the students and help them grow, improve, transform, and shine. And right intentions backed by right actions surely result into righteous and bright results. At Takshila, children enter with a curious, eager look and leave with a smiling, inspired one! You are welcome to experience the same.
